

Maps in Italian Atlases of the Sixteenth Century,

being

a comparative list of the Italian maps issued by Lafreri, Forlani, Duchetti, Bertelli and others, found in atlases

By R. V. TooLEY

During the middle decades of the 16th century Italy was the main producing and distributive centre of the map trade of Europe. This was due to various causes,—to her favourable geographic position, before the development of ocean highways altered the trade routes of the world, to the experience she had gained during the preceding centuries in the construction of sea charts (the manuscript portolani), to the wealth and mercantile enterprise of her inhabitants, and to the number and excellent workmanship of her engravers on copper.

Venice and Rome were the chief marts of the map industry. The most notable of the publishers in Rome was Lafreri. Antonio Lafreri, or to give him his correct patronymic, Antoine Lafrère, was a native of Burgundy, who migrated to Rome about the year 1540, Italianised his name, and in 1544 set up in business as an engraver and printseller in the Via del Perione. From 1553 onwards Lafreri was associated in business with an old established dealer, the elder Salamanca (Antonio). In 1562 Salamanca died, and a year later, the connection between the younger Salamanca (Francesco) and Lafreri was dissolved. From that date till his death in 1577 Lafreri published on his own account, and became the leading dealer in engravings in the Rome of his day. His part heir, and successor in the business, was Claudio Duchetti (*i.e.* Claude Duchet), who died in 1585.

The output of the Roman publishers was on the whole somewhat restricted in its scope, and dealt mainly with local Italian topography. They also showed a partiality for printing plans of cities and the delineation of notable historical events, such as contemporary battles in various parts of Europe, sieges, and the regiments and order of the Turkish army.

The publishers of Venice, on the other hand, catered for a more cosmopolitan taste. They offered a wider selection of maps to their clients, embracing nearly all the countries of the then known world. Perhaps it would be correct to say that the Venetians published a greater number of maps, for the Venetian and Roman dealers mutually borrowed one from the other, as occasion demanded, for the satisfaction of their customers. Sometimes they would use a map without alteration, at others they procured the copperplate, erased the original imprint, and substituted their own. The most prominent publishers and engravers in Venice at this time were Paolo Forlani, Ferrando and Donato Bertelli, Camocio, Cimerlino, Licinio, Nelli, Zaltieri and Zenoi. Overshadowing all his compatriots, both in the volume and importance of his work as a cartographer, was Giacomo Gastaldi. Born at Villa Franca in Piedmont, he removed to, and settled in, Venice, where his first work, a large scale map of Spain, was produced in 1544. He was appointed cosmographer to the Republic of Venice, and no less than 109 separate maps due to his industry have so far been traced. His more important works include two world maps, a revised and augmented edition of Ptolemy's geography with 64 maps, and maps of Africa, Asia, Eastern Europe, Italy, Poland and Lombardy. Other geographers and editors whose work was produced in Venice include Bernardo Silvano of Eboli, Benedetto Bordone of Padua, Antonio Floriani of Udine, Pietro Copo a resident in Istria, Giolito, Marcolini, Moleti, Girolamo Porro, Ruscelli, De Musis, Valgrisi and Livio Sanudo.

The maps produced by this galaxy of talent in Venice and Rome were issued and sold separately. Sometime prior to 1570, ¹an unknown individual conceived the idea of assembling a number of different

¹ The Yale collection contains a contemporary manuscript title, which declares that the volume was made in Rome in 1569 for the illustrious Don Antonio Xuarez. The latest dated map in the collection is 1568.

maps, folding the largest, and affixing marginal strips to the smallest to bring them all to a uniform size, and binding the whole together in atlas form. This idea was fortunately followed by others, and thus protected in book form many maps have been preserved which in their separate state would have possibly been lost or destroyed, a fate that has befallen the greater part of the maps produced north of the Alps during the same period.

This paucity of cartographical remains of the 16th century, of nations other than the Italian, has caused the merits of the northern geographers too often to be overlooked. The bulk of the Italian printed maps, other than maps of their own land, were necessarily based on the results of surveys made in other countries. The maps made in the North, principally executed on wood blocks, were frequently on a very large scale, a fact that in itself mitigated against their survival. The Italian map makers, apart from Gastaldi, were mainly adaptors and improvers rather than originators. Their sources of information were in the main the maps of their Germanic and French competitors, which they procured and reproduced in a superior manner on copperplates, either in their original or on a reduced scale. Thus the world maps of Mercator and Oronce Fine, the Austrian maps of Wolfgang Lazius, the maps of Scandinavia by Olaus Magnus and Anthoniszoon, the map of Switzerland by Tschudi, the maps of Jacob van Deventer of the Netherlands, and others, were copied and utilised by the Italian masters, not always with acknowledgement to the author. The woodcut maps, so important in the evolution of the cartography of Europe and the world, are in general far more rare than their Italian versions. Maps from wood-blocks were, however, also published in Italy, though in small numbers and mostly before 1500. Though printed in fairly large numbers, whole editions have entirely disappeared, and they are known for the most part by one or two examples only, from Italian reductions, or simply from written record.

The collections of 16th century Italian maps, on the other hand, are far from being as rare as has frequently been stated. Between sixty and seventy such volumes are now known to survive. Of the collections which have been described in print no two examples are alike, either numerically or in their contents. Not only is there no regularity in the selection of the maps, but there is also a lack of consistency in the delineation of particular localities. For example on different maps in the same collection, America may be shown separated from Asia by a narrow strait, or a wide sea, or joined to the Asiatic continent. They have, however, one feature in common: they are arranged in the old Ptolemaic order of precedence, and this, combined with the number of such volumes, tends to confirm the fact of an established practice, rather than individual haphazard formations, and justifies their inclusion among the atlases of the world.

The majority of these collections were issued without a title-page, but about 1570-72 a finely engraved title-page was printed, lettered *Geografia: Tavole moderne di Geografia de la maggior parte del mondo di diver'si autori raccolte et messe secondo l'ordine di Tolomeo con idisegni di molta citta et fortezze di diverse provintie stampate in rame con studio et diligenza in Roma*. The fact that this title bore a Rome imprint (though without specifying a publisher) and that Antonio Lafreri of Rome printed a list of the maps on sale at his establishment which more or less agrees with the contents of such collections, has led many to associate all such collections with Lafreri. This is far from correct, Forlani, Bertelli, and Duchetti at least having a claim in this respect. The collection possessed by the Birmingham Public Library, for example, is a Duchetti collection. The most numerous imprints are those of Duchetti (17), and the maps range from 1553 to 1580. Lafreri died in 1577. Another Duchetti collection is the Beans-Henry Stevens volume. Typical Venetian collections include the Bertelli volume, formerly in the possession of Messrs. Quaritch, now the property of H.H. Prince Youssouf Kamal, the volume in the National Maritime Museum, Greenwich, and Mr. Beans' Triester Lloyd example.

Some collections, such as those in Basle University and the British Museum, are composite, in the latter case several maps having been added to an original homogenous set. While not strictly speaking a contemporary collection, the atlas in the British Museum is among the most interesting to the student, for here, grouped compactly together in two volumes, are no less than 233 different maps (including variants) by 16th century Italian map makers. They are so arranged that, generally speaking, variants of a map follow one another, a system that greatly facilitates research. The Basle volume contains, besides Italian productions, maps from the *Theatrum* of Ortelius, the *Speculum* of de Jode, and a number of large scale maps of non-Italian origin. These have not been included in the comparative list. Recent

research, notably that of Prof. *Almagià*, has revealed that the practice of assembling separate maps in atlas form, was followed in Venice at an early date, and that the practice probably originated in that city. This opinion is reasonably based on the fact that the greater number of these maps were printed in Venice, and that a comparison of collections that contain the earliest issues of individual maps reveals a preponderating percentage of the works of the Venetian masters. Collections that contain the Rome title page mostly include maps of a later date, and probably the earlier Roman collections were issued without a title. An exhaustive study of the watermarks used on the maps, and particularly on the marginal strips, would do much in helping to settle questions of priority between the two centres, but the name of *Gastaldi* alone is sufficient to give a greater lustre to Venice.

The most comprehensive descriptions of these atlases so far printed have been those by *Nordenskiöld*, *Ruge*, and *Wieder*. The latest of these was published in 1916, and since that date additional collections have come to light (no less than three have appeared in the London market). The additional collections have revealed many new variants, and a few hitherto unknown maps. *Nordenskiöld*, listing the *Helsingfors* and *Collegio Romano* collections, gave 142 titles. *Wieder*, comparing the *Madrid* collections with the preceding and with the *Peckover* volume in the *Royal Geographical Society*, increased the number of titles to 176 (or 211 including variants). In the following list it has been possible to increase this to 661 titles by giving the collations of 35 collections. Of the 661 titles, the *British Museum* possesses the remarkable number of 318, the *Bibliothèque Nationale* just under 300, and *Mr. G. H. Beans* 195. The present list is intended for practical use rather than as a contribution to the history of Italian cartography, its main purpose being to assist collectors and librarians in comparing similar atlases which may come into their hands. Titles have been copied exactly as they are printed on the maps and in any apparent variations in the spelling of the same names or words this should be taken into account. Dedications have been given (in whole or in part) only where the map contains no other title save that embedded in the dedication. In this case I have departed from uniformity to facilitate identification.

The collections in England have been personally collated, the examples in Germany compiled from *Ruge*, those in Spain from *Wieder*, in *Helsingfors* from *Nordenskiöld*, and in the *Library of Congress* from *Lee Phillips' Catalogue*. The titles and particulars given here for a large number of maps are, therefore, not from personal examination; and though they are without doubt accurate in the main, the present writer cannot accept responsibility for them. The collations of the collections in the *Bibliothèque Nationale*, the *Royal Library*, *Copenhagen*, the *Lennox Library*, and *Yale University* have not previously been printed, and my thanks are due to their respective librarians for their courtesy and help in supplying the necessary information. My object has been to gather together previously scattered information, and as far as possible to show the comparative rarity or frequency of occurrence of the individual maps contained in my list. The result is far from exhaustive, but I hope it will encourage a more extensive study of one of the most interesting and brilliant periods in the history of cartography.

ARRANGEMENT.

The maps are arranged in the following order :—

General Maps—

The World	Nos.	1-24
Europe	Nos.	25-39
„ (Northern Regions) ...	Nos.	40-45
Asia and Asia Minor	Nos.	46-66
Africa	Nos.	67-76
America and the West Indies ...	Nos.	77-93

Particular Countries, Districts & Towns

in one alphabetical List	Nos.	94-604
Miscellaneous	Nos.	605-616

Geografia : Tavole moderne di Geografia de la maggior parte del mondo di diversi autori raccolte et messe secondo l'ordine di Tolomeo con idisegni di molte citta et fortezze di diverse provintie stampate in rame con studio et diligenza in Roma.

An engraved title lettered as above is found prefacing the following collections :—B. ; BHS. ; LC. ; M. ; RGS.p; RGS.w; VE.

WORLD.

[1] [Double Cordiform or heart shaped Map.] **Ant. Sal[amanca] exc. Romae. (n.d.)**
512 x 323 mm.

BM. (1) 1 ; BN. (Ge.D.5044) ; Bre. 1 ; D.(a)5 ; H.3. Also separately, Be.

Reproduced in facsimile by G. H. Beans, Phila. 1933. An Italian copy of Mercator's world map of 1538, which in its turn was based (with important modifications, e.g. the separation of the continent of America from Asia) on Oronce Fine's world map of 1531.

[2] [Another Issue.] **Ant. Lafreri exc. Romae. (n.d.)**
510 x 324 mm.

B.3; BN.(Ge.D.5045) ; Btl.2 ; D.(I)5 ; G.6; GH.3; LC.3 ; Lx.4; M.6; N.9; OL.4; RGS.p,3 ; RGS.w. 3; Stu.6 ; VE.1,5 ; VE.11,6 ; Y.5. Also separately, BM.92o(256).

Reproduced in *Facsimile Atlas*, fig. 54.

[3] **Vniversale. Giacomo Cosmographo. In Venetia, MDXXXVI. (1546)**
532 x 365 mm.

BN.(Ge.D.3284) ; Btl.3 ; MN.2 ; Stu.5 ; VE.IIL3 ; Y3. Also separately, BM.(K.4.6) and Leyden, Univ. Lib.

Giacomo Gastaldi's first world map, on an oval projection, one of the most important maps of the 16th century. It was re-issued, with slight variations, at different dates up to the end of the century (*see nos. 4-17*), and its adoption by Ortelius as a basis for his world map in the *Theatrum Orbis Terrarum* of 1570, gave the widest possible circulation to this presentation of the earth's surface. Ortelius, however, did not borrow directly from the first edition of 1546 but from

[4] the 1555 version by De Jode, entitled " *Universalis, exactissima atque non recens modo, verum et recentioribus nominibus totius Orbis insignita descriptio, quo nomine studiosis omnibus non tam utilis quam maxime necessaria, per Jacobum Castaldum Pedemont Cosmgr. apud Venetos. Veneunt Antverpiæ a Gerardo Judæo 1555* " (5°6 X 800 mm.). This edition was consider-

ably altered and improved, but as in Gastaldi's issue of 1546, North America is shown joined to Asia, Mercator's correct assumption of a strait between the two being rejected.

[5] F. Muller possessed in 1912 a proof impression of the original edition of 1546, before the insertion of the clouds that form an ornament round the map, and without the word *Amazon* in South America.

[6] The original issue of 1546 was likewise re-issued on a larger scale, with slight modifications and different decorations, with the following title : " *Del' Universale Iacomo Gastaldo Cosmographo In Venetia. In Venetia per Matio Pagan in Frezaria al Segno della Fede.* " Woodcut, 770 x 520 mm. The only known copy is in the British Museum (Maps 116, b.13).

The original issue of 1546 is reproduced in *Remarkable Maps*, IV.pl. 2.

[7] **Paulus de furlanis Veronensis opus hoc exmi. Cosmographi Dni Iacobi gastaldi Pedemontani Instauravit, ... Venetiis. Ioan. Francisci Camotii aereis formis. Ad signum Pyramidis Anno MDLX. (1560)**
536 x 291 mm.

BM.(I)2 ; BN.(Ge.D.79I3); Bre.2 ; D.(2)6; G.5 ; H.4; RGS.W.2 ; also separately BM.(920(41)).

A re-engraved re-issue of Gastaldi's map of 1546, with new lettering and symbols and fresh decorations.

[8] [Another Issue.] **MDLXII. (1562)**
531 x 290 mm.

D.(I)4; M.5; Q.I ; VE.1,4 ; WO.(1)1; Y.I ; also separately, BM.(Maps C.7.C.9.1.)

Reproduced in *Periplus*, fig. 77.

[9] **Vniversale descrizione di tvtta la terra conoscivta fin qui. In Venetia al segno del Pozzo. [Dedicacation in top left corner to Conte Giermo Canossa, with acknowledgement to Gastaldo, by Paulo di forlani da Verona]. 'A Benigni Lettori... MDLXII. (1562)**
675 x 395 mm.

BM.(K.4.4.)

A new edition of Gastaldi's map, fundamentally the same as the edition of 1546, but engraved on a larger scale with new lettering, symbols and decorations, some new names, viz. *Nueva Franza, Larcadia*, etc., and a notable alteration in the river suestem of America.

[10] Bagrow records an issue of the same year by Ferando Bertelli of larger format, 768 x 428 mm., dedicated to Bartholomio Zacco, in which the name of Gastaldi is not mentioned.

- [11] **Vniversale descrittione di tvtta la terra conoscivta fin qui...** Paulo forlani Veronese fecit. Ferando berteli Exe. 1565 Fer. Bertelli libraro. (1565)
760 x 430 mm.
Ba.2; BM.(2)68; BN.(Ge.C8457); G.4; M.3; OL.2 ; Q.2; Ro.I ; Stu.4 ; VE.1,2 ; VE.11,4 ; Y2.
A new rendering of Gastaldi's map of 1546 in larger format. America is still joined to Asia, but a large southern continent stretching across the whole of the base of the map is inserted. In the editions of 1546 and 1562 (Nos. 3 and 9) a land mass is shown off the south coast of South America only, the southern Atlantic and Pacific Oceans being unconfined. Gastaldi's name no longer appears on this edition of 1565. Reproduced in *Remarkable Maps*, IV, pl. 3. G. H. Beans possesses an earlier issue undated, as also the above as a separate.
- [12] Bagrow records a later variant with Forlani's name removed, Breslau Stadtbibliothek. Also Btl5, and—
- [13] A later undated impression in which the name Lucca Bertelli supersedes Ferando Bertelli. Munich, Hof- und Stadtbibliothek.
- [14] **Vniversale descrittione di tvtta la terra conoseivta fin qui. In Venetia alla libreria del segno del S. Marco In Merzaria D[onato] B[ertelli] MDLXVIII.** (1568)
750 x 420 mm.
BM.(2)70; Btl.4.
A re-engraved re-issue, of the preceding, with fresh decorations.
- [15] **Vniversale descrittione di tutta la terra conoscivta fin qui...** Paolo Forlani Veronese f. Claudij ducheti formis Anno MDLXX. (1570)
740 x 407 mm.
B.2 ; BN.(Ge.DD.655) ; BHS.I ; GH.2 ; LC.2 ; RGS.p.2.
- [16] B.M.(K.4.5.) is a further issue " Vniversale descrittione di tutta la terra conoscivta fin qui. Ferando berteli Exe." 1571. (762 x 435 mm.)
This is a re-issue of the 1565 variant (*see* No. 11). Another example is in BN.(Ge.B.I5I3). There is a later issue dated 1599.
- [17] **Vniversale descrittione di tutta la terra conoscivta fin qui. In Venetia al segno del Pozzo. Nicolai Valegij formis. Paulo di forlani da Verona. In Venetia l'anno MDLXXVI.** (1576)
672 X 392 mm.
BM.(I)₃.
A re-issue, from the same plate as the 1562 Forlani edition, *i.e.* before the insertion of a southern continent across the base of the map.
- [18] **[World in two hemispheres.] Michaelis Tramezini Formis. MDLIII. Ivliivs de Mvvis Venet. in aes incidit MDLIII.** (1554)
1500 x 1500 mm.
BN.(Ge.B.III3) ; Btl.7-7a ; D.(1)2-3; Fln.I ; G.2-3; OL.I.
M.I ; Stu.2 ; and Y.8 possess the western hemisphere only.
Other examples of both spheres are in BM.(K.4.2.): University Library, Leyden, Royal Archives, Turin, and Madrid.
Reproduced in *Remarkable Maps*, I. 1-4 ; and *Periplus*, p. 146-7, figs. 65-66.
- [19] **Cosmographia uniuersalis ab Orontio olim descripta. Ioannes Pavlvvs Cimerlinus Verone sis in aes incidebat Anno 1566.** (1566)
580 x 518 mm.
BM.(2)69; BN.(Ge.D.7907) ; Btl.I ; GH.4 ; N.4 ; OL.3; VE.1,3; VE.II,5.
Also BM(K.4.I.); Breslau, Stadtbibl., and Vienna, Hauslab. Lichtensteinsche Bibl.
Wieder records the above with the date 1556 for M.4 and MN.I. According to Almagià this is an error. Bagrow, possibly quoting Wieder, reaffirms an issue of 1556. This map of 1566 on a single heart-shaped projection is an Italian copy of a French original compiled by Oronce Fine in 1534 and printed in Paris from a woodblock, 1536, with title " Recens et integra Orbis Descriptio." Reproduced on a small scale in *Facsimile Alias*, fig. 53.
- [20] **Cosmographia uniuersalis et exactissima iuxta postremam neotericorum traditionem Venetijs ealendis Maij MDLXIX ad signum Pyramidis.. [Dedicated to Agostino Valerio by Jo. Franc. Camotio.]** (1569)
1045 x 625 mm.
BN.(Ge.D.12252); Btl.6; MN.3.
Large oval Gastaldi world map with a new conception of North America, that continent being separated from Asia by the Strait of Anian.
- [21] In the Gotha volume there was a Venetian issue dated 1581. This is now in the Beans Collection.
- [22] In the British Museum is a similar but undated map " Totivs Orbis Descriptio," 776 x 491 mm. BM.(K.4.3.) In each corner of the rectangular framework of the map is a bird's-eye view of a city, Venice, Rome, &c.
Another copy is in the Beans Collection, formerly Gotha 14.
- [23] **[World in 2 hemispheres in gores.] Antonius Florianus. Utin.** (n.d.)
825 x 460 mm.
BM.(I)4; BN.(Ge.C8459) ; Btl.8 ; D.(I)I ; D.(2)4; G.I ; H.1-2 ; LC.I ; Lx.1-2 ; M.2 ; N.2 ; RGS.p.I ; Stu.I ; VE.I.I ; VE.11,2 ; VE. III.I ; Y.I. Also separately Be.
Reproduced in *Facsimile Atlas* on a small scale, fig- 48.
- [24] **Ptolemaei typvs.** (n.d.)
260 x 190 mm.
BM.(2)72 ; D.(I)6b ; G.7 ; LC.4 ; Lx.3 ; M.7 ; OL.5 ; RGS.w.I(a); Stu.3(I) ; VE.I,6 ; VE.11,7 ; VE.III.2 ; Y.6. Also separately Be.
This small map is usually to be found pasted together with *Septentrionalium partium nova Tabula* (*see* No. 4-5), and is taken from the 1562 Moletius edition of Ptolemy. Ruge, WO. (1)2, cites a small world map without title or date, 194 X 107 mm.
- EUROPE.
- [25] MDLIX. II Dissegno particolare delle Regioni che sono da Constantinopoli a Venetia, da Venetia a Viena et da Viena a constantinopoli... opera noua di Jacomo gastaldi piamotese ... fabius licinius fecit. (1559)
1039 x 355 mm.
D.(2)71.

- [26] [Map of the country from Gulf of Venice—Belgrade—to Black Sea, the eastern sheet marked] MDLX... In Roma per Ant. Lafrerj. fabius lieinius fecit. (1560) 1010 x 700 mm.
Ba.92; B.30-31; BM.(2)20-21; BN.(Ge.D.6533); Btl.106; Cop.15-16; D.(1)37-38; G.36-37; GH.29; LC.29-30; Lx.36; M.46; N.47-48; OL.37; Ro.27-28; RGS.p.25.26; Stu.32-33; VE.1,37; VE.II,35; VE.111,44; Y.39-40.
According to Bagrow, this is the Roman version of the Venetian original cited above, Lafreri removing the original title, inserting his own name after the privilege, but retaining that of Fabius Lieinius.
- [27] There is an intermediate issue of the second or eastern sheet, with the original title removed, dated MDLX, but without Lafreri's name. Examples are in RGS.W.33 and R0.28. See note to following item.
- [28] Geographia particolare d'una gran parte dell' Europa, **nuouamēte** descritta co i confini suoi, e prima uerso leuāte e il meridiano di **constātinopoli**, e da **ponēte** il meridiano **della mag^{ca}** cita di Venetia, et da **tramōtana** il parallelo di Vienna in Austria, e uerso Ostro il parallelo che passa per il mezzo dell' isola di Candia... Opera nuoua di Giacopo di Castaldi piemontese. (1560) 531 x 485 mm. (for S.W. sheet only, the 4 sheets 1045 x 827 mm.)
B.41; BM.(1)109; BN.(Ge.C.6181-2); Btl.106; D.(1)54; G.42; LC.44; Lx.50; M.70; N.67; OL.5; RGS.p.4; RGS.w.30; Stu.45; VE.1,55; VE.II.45; VE.111,59; Y.59. Also N.W. sheet, BM.(1)57.
This large map of South East Europe consists of 4 sheets, but in most collections these sheets are separated, not only from one another, but distributed in different places in the atlas. The complete map is made up as follows:
N.W. Sheet—No title (shows part of Italy, Austria, Hungary, Dalmatia, &c.)
N.E. ,, —No title (Walachia, Bulgaria, Rumania, &c, dated 1560, with privilege, Lafreri's imprint, and "fabius lieinius").
5 W. ,, —Title as at head of this item (Central and Southern Italy, Sicily and part of Balkans).
S.E. ,, —No title (Balkan peninsula and part of Asia) "fabius lieinius fecit Venetiis."
The N.W. and N.E. sheets are described in item (No. 26), and usually occur together. The S.W. sheet contains a cartouche in left lower corner lettered as at head of this item, the S.E. sheet bears in lower right corner "fabius lieinius" (see No. 281). This S.E. sheet is placed usually among the maps of Greece. In the BM. and Btl. collections, the 4 sheets are joined together and form one large map.
- [29] Opera de M. Giac^{mo} Castaldi Piamōtese cosmographo in Venetia. La discriptione **della** Transiluania et parte del' Vngaria, et H simile della Romania... Da Paulo Forlani Veronese, intagliata l' Anno 1566. (1566) 1018 x 505 mm.
Ba.92a; BM.(1)55; BN.(Ge.C.6184); Btl.68; MN.25 R0.29.
A new edition of Gastaldi's map of 1559, on 3 sheets instead of 2. The easternmost sheet is lettered as above, the centre sheet bears no name or title, the westernmost sheet is lettered, "Opera de M. Giacomo Castaldi Piamontese Cosmografo in Venetia. Disegno particolare de Regni, e Regioni, che son da Venetia, a Costātinopoli, et da Costantinopoli, a Vienna, d' Austria, et da Vienna, a Praga Citta regal di Boemia... Da Paolo Furlani Veronese intagliata con diligentia in merzaria al segno della Colona." Further examples of this western sheet are in Bibl. Marciana, Venice, and Silvestriana, Rovigo.
All three sheets are reproduced in *Remarkable Maps*, tab. 24, A.B. and C.
- [30] Ioannis Petri **Contarini**... totius Europae, ac partis Asiae nee non littorum Africae descriptio... **qui**... earn ab egregiis Geographicis passim colligens, et in aere postmodum incisam praebuit... **Venetii** MDLXIII 16 sheets, each 335 x 445 mm. (1564)
Q.3a-q & BM. (15 out of 16 sheets). Also Stadtbibliothek, Breslau, Bibliotheca Alessandrina, Rome, and Biblioteka Unversyteck Vilna.
Reissued also on 16 sheets in 1572. Of this second edition no copy is now known.
- [31] [Small map of Europe without title.] Girolamo Olgiato 1567. (1567)
138 x 105 mm.
Btl.13; BN.(Ge.F.2275).
- [32] BM. Maps 28.bb.41.(50.) **Europa in** forma picciola... MDLXVIII Dominico Zenoi appresso Gio. **Fra^{co} Cam^{pio}**. 158 x 125 mm. (1568)

ESTLAND.

- [197] Estland. [No engraver or publisher.] (n.d.)
183 x 245 mm.
BM.(2)70b; BN.(Ge.DD.655(8)); BHS.26; D.(I)8;
G.8; Lx.7; M.10; N.11; OL.8; RGS.p.8a; Stu.7;
VE.1,9; VE.11,9; VE.111,9; Y.10.
This map of Estland is sometimes found pasted
together with a map of Frisland (*see* Nos. 222-223).
The latter is known in two states, with title only as
above, and also with the imprint of Petri de Nobili-
bus. Estland may also exist in the same number
of states, but I have only remarked it as above.
The British Museum catalogues this map as the
Shetland Islands.

FAERO ISLANDS. *See* Frisland.

FLANDERS.

- [198] Flandriae recens exactaq. Descriptio notarum

FRISLAND. (Island of)

The identity of Frisland requires a special study.

In the British Museum catalogue it is indexed under the Faero Islands. The island, however, is largely, if not entirely, imaginary. Frisland appears both on maps of an earlier and a later date, and by different cartographers it is placed in widely varying longitudes. It appears in the Zeno Myth, and in some cases it is even placed as far west as an island off the North American coast.

[222] **Frisland. [No engraver or publisher.]** (n.d.)
184 x 248 mm.

B.6; BM.(2)70a; BN.(Ge.DD.655(9)); D.(I)9; G.9; Lx.7; M.11; N.10; OL.9?; RGS.p.8; Stu.8; VE.I,10; VE.II,11; Y.11.

[223] **Frisland. Petri de Nobilibus Formis.** (n.d.)
184 x 248 mm.

BM.(1)156.

This map forms a companion to and is sometimes found pasted together with Estland (see No. 197).

Also separately BM.(c.7.c.9.7) ; BM.(K.111.121) ; and
Breslau, Stadtbibl.
This map is sometimes found pasted together with
Zelandia [No. 602] as a companion piece.
- [267] Gotlandia. [Without Bertelli's name.] (n.d.)
190 x 250 mm.
B.27 ; BN.(Ge.DD.655(31)) ; D.(I)29 ; G.29 ; Lx.30 ;
M.38 ; N.38 ; OL.30a ? ; RGS.p.22 ; Stu.27 ; VE.1,30 ;
VE.11,22.

Gravelines. See Miscellaneous, No. 604.

GREAT BRITAIN.

- [268] Britanniae Insulae quae nunc Angliae et Scotiae
regna continet cum Hibernia adiacente nova descriptio.
G. L. A. Romae Anglorum studio et diligentia MDXLVI.
763 x 573 mm. (1546)
BN.(Ge.DD.628(84)) ; Btl.19 ; D.(2)12 ; Fln.127.
Also separately BM.(K.5.1) ; National Library Dublin ;
and Bg.4.
Reproduced plate 2, "Six Early Printed Maps,"
British Museum 1928 ; and with descriptive text by
Edward Lynam, "Map of the British Isles of 1546,"
pub. by G. H. Beans, Phila. 1934.
A rare and important map. Attributed to George
Lily, it is, apart from representations in early editions
of Ptolemy, the first printed map of the British Isles.
The north is to the right of the map. It was re-issued
as follows :—
1549. Antverpiae per Joannem Mollijs.
1555. Londini Anno 1555 T Gemini,
and in the following items (Nos. 269-274).

- [269] Britannia Insvla quae dvo regna continet Angliam
et Scotiam **cvm** Hibernia adiacente. [Tablet on right]
Britannia Insularum . . . cun. privilegio sumi pontificis
MDLVI. (1556)
352 x 485 mm.
Ba.20 ; B.8 ; BM.(2)n ; BN.(Ge.D.7675) ; Btl.17 ;
Bre.6 ; D.(1)10 ; O.(2)13 ; G.11 ; H.8 ; LC.8 ; M.13 ;
OL.11 ; RGS.p.9 ; RGS.w.6 ; Stu.n ; VE.II.15 ; Y.14.
Also separately BM.(K.5.2) ; Leyden, Univ. Library ;
and Bf.2.
A re-issue of the map of 1546 on a smaller scale,
with a few minor alterations, e.g. *Puteus Peke* in
Derbyshire, and *Vectis Insula* are omitted. *Lacus
Foilus* in Ireland is removed and *St. Patrick's Purgatory*
is changed to *Armacana Metrop.* The orientation is
also different, in this 1556 edition the north being at
the top of the map.
Reproduced in *Remarkable Maps*, V/VI. pl. 10.
- [270] Another rendering of the 1546 map also appeared
in this year, viz. a woodcut by Andreas Vavassor.
BM.(1080(56)).
- [271] Britanniae insvlae quae **nvnc** Angliae et Scotiae regna
continet **cvm** Hibernia adiacente nova descriptio.
Romae Anglorum studio et diligentia. MDLVIII Sebas

tianus a Regibus Clodiensis In aes Incidebat. (1558)
543 x 397 mm.

B.7 ; BM.(I)11 ; BN.(Ge.DD.628(83)) ; Cop. 2 ;
D.(I)11 ; G.12 ; GH.6 ; H.7 ; LC.9 ; Lx.10 ; M.14 ;
Met.1 ; N.15 ; OL.12 ; R0.2 ; RGS.w.4 ; Stu.10 ;
VE.1,12 ; Y.13. Also separately Dresden ; Palermo,
Bibl. comm. ; National Library, Dublin : and Vienna,
Hofbibl.

A re-issue on a slightly smaller scale of the 1546
map, not of the 1556 issue, that is to say *Puteus Peke*,
Vectis Insula, etc. are shown. As in the first edition
of 1546, this 1558 issue has the north on the right of
the map.

Reproduced in *Facsimile Atlas*, fig. 78.

- [272] Britania insvla quae dvo regna continet Angliam
et Scotiam **cvm** Hibernia adiacente [Tablet on right]
Britannia Insularum . . . Ferando de Berteli **exc.** 1561
. . . **Vene** tiis Anno **MDLXII.** (1562)
349 x 480 mm.
BM.(I)10 ; BN.(Pf.224(1341)) ; Btl.18 ; Go.96a ; Lx.9 ;
MN.9 ; Met.2 ; N.14 ; Q.7. Also separately BM.
(K.5.3) ; Breslau, Stadtbibl. ; and Nurnberg, German.
Mus.
This edition shows the greatest variation from the
1546 original. It follows the edition of 1556 in that
the north is at the top of the map, but though of later
date, it gives less information. No towns are marked
on the Isle of Man or Anglesey, and the cathedral
towns are not particularised with a cross, all features
of the 1556 edition.
- [273] Another issue appeared in Venice in the following
year with imprint MDLXII I Venetiis ex Camocii
formis (BM.Maps C.7.c.9.6) ; BN.(Ge.B.1526) ; and
Breslau, Stadtbibl. This is a re-issue of the 1556
edition.
- [274] Britaniae insvlae quae **nvnc** Angliae et Scotiae
Regna continet cum Hibernia adiacente nova descriptio
Marc. Clod, typis Romae 1589. (1589)
517 x 381 mm.
BM.(I)9 ; BN.(c.13075) ; BHS.24.
A re-issue of the 1558 edition with the north on
right hand side of the map.
- [275] [Text] Nova et Antiqua Locorum Nomina in Anglia.
Folio sheet.
B.9 ; GH. no number ; Lx.12 ; M.15 ; N. no number ;
RGS.p.14 ; RGS.W.7 ; VE.1,12 ; VE.II.13.
- [276] L'Isola d'Inghilterra che gl' Intiqui la chiamauano
Britania e l'Isola d'Irlanda la nommauano
Hibernia . . . (n.d.)
143 x 143 mm. [or incl. text below 143 x 214 mm.].
BM.(I)8 ; Ba.20a?
Ruge records, Ba.20a as follows, Anon. Inghilterra
before 1570.
- [277] Anglesey isola dell Inghilterra gia ditta Mona, (n.d.)
4to.
BN.(Pf.225(1422)).
Great Britain. See also under Ireland.

Correspondence

To the Editors of

Imago Mundi

Having recently received from two of the largest libraries in the United States an invitation to become a member of the Friends of those institutions, it suggests a thought which may appeal to map collectors.

We map collectors now have one—and only one—"institution" definitely devoted to our speciality, *Imago Mundi*. Why not "Friends of *Imago Mundi*."?

If its present high standard can be combined with punctual yearly publication, the collector of old maps will be assured the nearest possible approach to a Cartographical Society, short of that dream.

If a certain number of your readers agree to contribute £1 yearly, in addition to the subscription price, toward the strengthening of the foundation upon which *Imago Mundi* stands, would it not be a good investment in our hobby?

If you care to broadcast this thought, you can put me down as a charter member of the Friends of *Imago Mundi*.

Respectfully,

G—————B—————.
